Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Barz et al (US Patent No. 5,902,625).

Barz et al teach a process for making a fibrous cheese comprising pasteurizing, acidifying, coagulation, cutting of the coagulum, removal of whey, addition of a food additive, and production of a cheese product (see entire document, especially column 3, lines 23-27 and column 4, lines 26-55).

Claims 2-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Barz et al (US Patent No. 5,902,625).

Barz et al is cited as above.

The claims appear to differ as to the addition of a specific fat extender.

Barz et al teach dairy solids and cheese powders where it is noted that it is well known in the art these are milk fat containing products. The claimed fat content would

Art Unit: 1761

be no more than inherent and/or obvious to that of Barz et al because Barz et al teach fat containing additives.
